SUBJECT: Special Invitation - CodeJIKa Coding Workshops in Your School

Hi and welcome to CodeJIKa!

Congratulations! Your school has been carefully selected to take part in the CodeJIKa program. You will receive free posters and two workshops for up to 30 eager students.

We work with forward-thinking secondary school management teams to bring cutting edge skills to their most energetic and enthusiastic learners. If you accept, you will become part of a network of forward-thinking schools implementing the latest methodology in education.

What's required of you? How do I sign up?

The first step is to sign up and organize the two free workshops as soon as possible.

CodeJIKa is offering two free "1 Hour-Website" workshops to your school.

Conditions: These workshops are only available in June and July of 2018. Please coordinate with your area representative for dates. These are often best accomplished during a holiday or Saturday morning.

Get in touch with our area representative, management team or even me directly if you have any questions or see a way we can work together better and implement beyond these workshops.

Thank you for your collaboration and willingness to grow and embrace a new movement. We appreciate your efforts to bring quality education to our youth.

Partner with us.

Jonathan. D. Novotny
co-Founder | Chair of the Board

CodeJIKa is an initiative to bring coding skills to all secondary school learners.

We've started by identifying special schools which we believe will act as catalysts and lead the way.

It has presented and partnered with National and Provincial Departments of Basic Education to give students an opportunity now to grow into digital entrepreneurs and coders - Equipping learners with the tools to build in the Fourth Industrial Revolution and empowering them to confidently plan their future and opportunities it will bring.
